

## DANH MỤC CÁC BÀI BÁO QUỐC TẾ

1. Highly photocatalytic activity of novel nano-sized  $\text{Ag}_3\text{PO}_4$  for Rhodamine B degradation under visible light irradiation, *Materials Letters*, Volume 92, , Pages 57-60, **2013**
2. Catalytic pyrolysis of biomass by novel nanostructured catalysts, *Proceedings of SPIE - The International Society for Optical Engineering*, vol. 8923, pp. , **2013**.
3. Study on photocatalytic activity of  $\text{TiO}_2$  and non-metal doped  $\text{TiO}_2$  in Rhodamine B degradation under visible light irradiation. *International Journal of Nanotechnology*, Volume 10, Numbers 3-4, pp. 235-246, **2013**
4. Study on synthesis and photocatalytic activity of novel visible light sensitive photocatalyst  $\text{Ag}_3\text{PO}_4$  *International Journal of Nanotechnology*, Volume 10, Numbers 3-4, pp. 187-196, **2013**
5. Synthesis of novel silver vanadates with high photocatalytic and antibacterial activities, *Materials Letters* Volume 12, Page.176–180, **2014**
6. Isomorphous substitution of Cr by Fe in MIL-101 framework and its application as a novel heterogeneous photo-Fenton catalyst for reactive dye degradation, *RSC Adv.*, 4, 41185-41194, **2014**
7. Arsenic removal from aqueous solution by adsorption using novel MIL-53(Fe) as highly efficient adsorbent, *RSC Adv.*, 5, 5261-5268, **2015**
8. Immobilization of D-Amino Acid Oxidase (DAAO) Enzyme on Hybrid Mesoporous MCF, SBA-15 and MCM-41 Nanomaterials, *Journal of Nanoscience and Nanotechnology* Vol. 16, 1–7, **2016**
9. Ordered Mesoporous Carbons as Novel and Efficient Adsorbent for Dye Removal from Aqueous Solution, *Advances in Materials Science and Engineering*, Volume 2016, Article ID 6528315,9 pages, <http://dx.doi.org/10.1155/2016/6528315>, **2016**
10. Removal of  $\text{Cd}^{2+}$  and  $\text{Cu}^{2+}$  ions from aqueous solution by using  $\text{Fe-Fe}_3\text{O}_4/\text{graphene oxide}$  as a novel and efficient adsorbent, *Mater. Res. Express*3, 105603, **2016**
11. Highly photocatalytic activity of novel Fe-MIL-88B/GO nanocomposite in the degradation of reactive dye from aqueous solution, *Mater. Res. Express* 4, 035038, **2017**
12. Highly catalytic performance of novel Ni-Cu containing SBA-15 materials in the hydrodeoxygenation of guaiacol, *Biointerface Research in Applied Chemistry*, Volume 8, Issue 2, **2018**
